

Curriculum Review

Learning Progressions, aligned to State Standards, are reviewed annually. The Learning Progressions provide the learning targets with which teachers align instruction and assessments. Additionally, instructional resources which directly support the Learning Progressions are selected and used to meet the needs of diverse learners.

Substantive changes in any area of the curriculum, be it an addition, expansion or deletion of a current curriculum area will be publicly presented to the School Board at the appropriate time prior to implementing a curriculum change.
