

Circulation of Materials

In order to minimize the non-educational responsibilities of the administration and faculty, and to be equitable to all, it is the policy of the Ashland School District to restrict the circulation of material to the general student population to material produced and approved by the administration and/or faculty. Such restrictions include any material developed, produced or printed by any citizen or group of citizens with the intent to distribute to the general student population that has not been specifically requested by the administration or faculty.

Exceptions to the restrictions of this policy are as follows:

- Materials provided by the Town of Ashland related to the well-being of the Town and/or its citizens.
- Materials provided by other recognized State-approved educational organizations such as other SAUs or the State Department of Education.
- Materials provided for individually identified students. Such material may only be distributed with the prior approval of the Principal and the faculty member who is responsible for the student.

Should an individual wish to circulate material to the general student population a request is to be made directly to the Principal. Should the Principal decide that the material is acceptable, the material will be allowed to be posted in one or more public areas designated by the Principal, with copies available to students or parents at the school's office.
